

Hatch® TeachSmart® Learning System 2.0 Software Package

Recent Study proves TeachSmart improves Outcomes in Literacy & Math!

The TeachSmart® Learning System Software Package provides a hands-on technology tool that enables early childhood teachers to effectively provide children with purposeful and playful activities. The TeachSmart Software Package features strategies and activities that reflect the latest scientific research for pre-literacy and mathematics concept acquisition in young children. At the touch of a fingertip, teachers and children can:

- Access more than 1,100 activities
- Develop a variety of cognitive skills (phonological awareness, number recognition, counting, pre-writing & more)
- Create individual portfolios for each child

Introducing Activity Management for Teacher Planning with TeachSmart 2.0

- Browse and select activities fast with intuitive navigation
- Search for activities by Categories, Keywords and National Standards Correlations
- Plan and schedule activities for individuals and groups in advance
- Quickly launch a day's scheduled activities from the calendar
- Integrate your own activities seamlessly into TeachSmart Learning System

The TeachSmart Software Package works with any type of interactive whiteboard!

Please note the software package is licensed for use on one (1) computer only and may not be reproduced on additional computers without express written consent from Hatch®, Inc. Unauthorized use may result in legal action.
