TeachSmart® 2.0 introduces Activity Management for Teacher Planning

TeachSmart® 2.0 is an interactive whiteboard technology tool which supports early childhood education with playful and purposeful activities that tie to state and national standards.

Children can independently access more than 1,100 activities with a simple touch—turning the system into an interactive learning center for everyone to use.

This product offers strategies that reflect the latest research in pre-literacy and mathematics concept acquisition in children. Activities strengthen development in five key skill areas: Phonological Awareness, Counting, Number Recognition, Pre-writing and Social/Emotional Development.

A recent study of preschoolers using TeachSmart in their classrooms for six months showed significant improvements in literacy and mathematics scores.

Easy-to-Follow Instructions

TeachSmart offers instructions for the implementation of each activity and details on the correct group size and which skill areas are developed by successfully completing each activity.

Lesson Planning

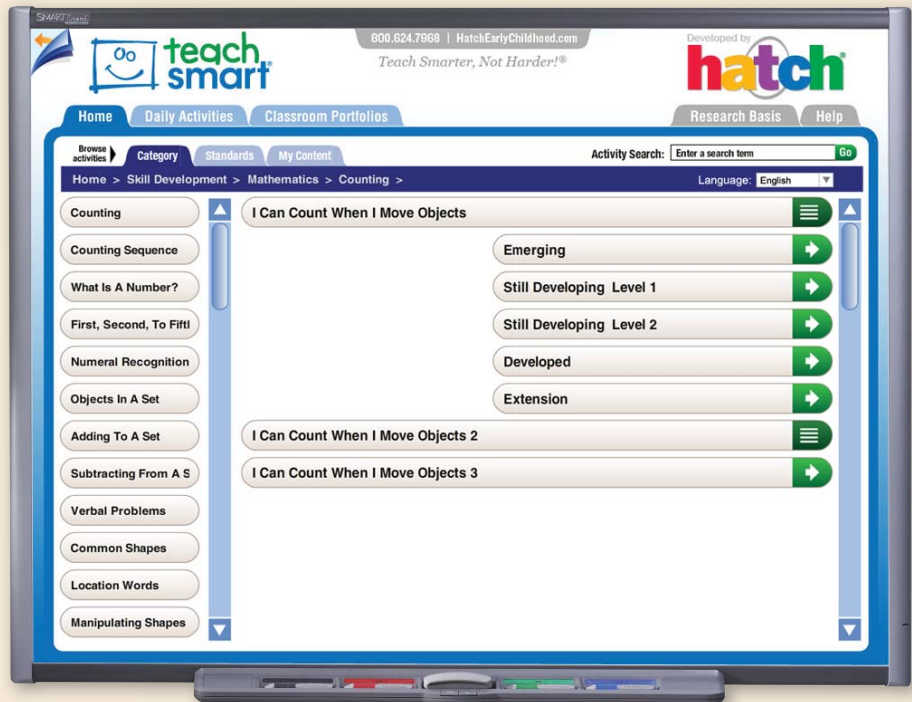

TeachSmart has an intuitive menu structure and allows quick transitions using selection history. The clear organization of features and activities assures efficient use of time spent planning and preparing. Teachers can create a schedule of activities for individuals or groups and access a day's activities from the integrated calendar.

Make It Your Own

Use TeachSmart technology to modify individual activities to meet the special needs and interests of your children. Step-by-step instructions guide teachers through the "Make it Your Own" process, allowing teachers to customize and create their own activities. Teachers can utilize hundreds of images in the system's library.

Beyond the Board

This feature expands TeachSmart's strategies and activities to other centers in the classroom, creating a full opportunity to experience and learn concepts.

Individual Portfolios

TeachSmart allows teachers or children to save performance information in a digital portfolio that can later be accessed for assessment and parent conferences. This provides teachers the ability to follow a child's progress through scaffolded levels.

Standards

The strategies and activities in TeachSmart meet or exceed national standards and each activity includes details on how it aligns with identified standards. Teachers can search the library of activities for content that is focused on a particular standard.

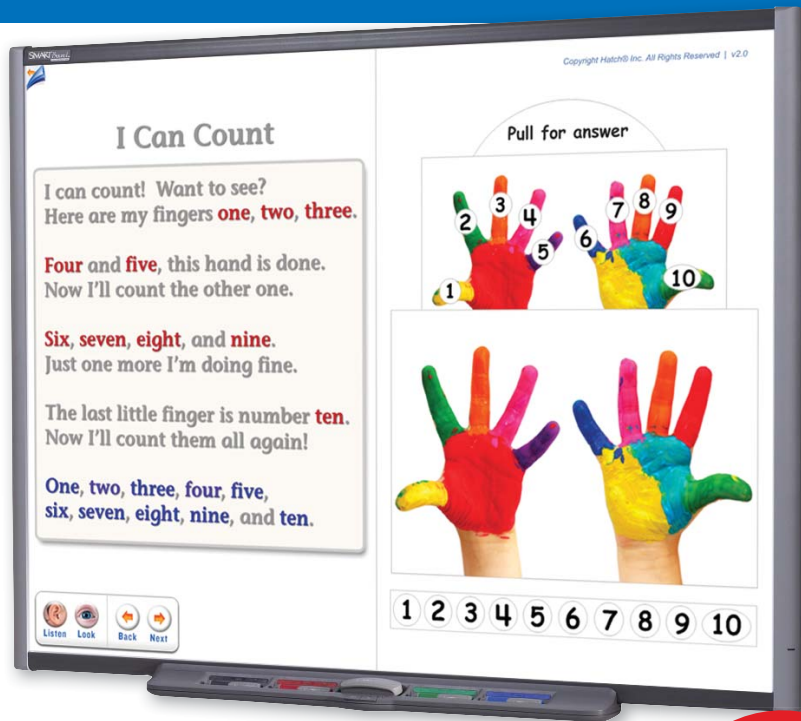

Digital Portfolios allow teachers to monitor a child's progress in Scaffolded Levels

With the TeachSmart® Learning System's research-based activities, teachers can be assured their children are developing both **cognitive** and **social/emotional skills**. The system outlines how each activity aligns with national standards.

TeachSmart provides the teacher with **tested, research-based strategies** that can be successfully used by an individual child or in pairs, small group and classroom settings.

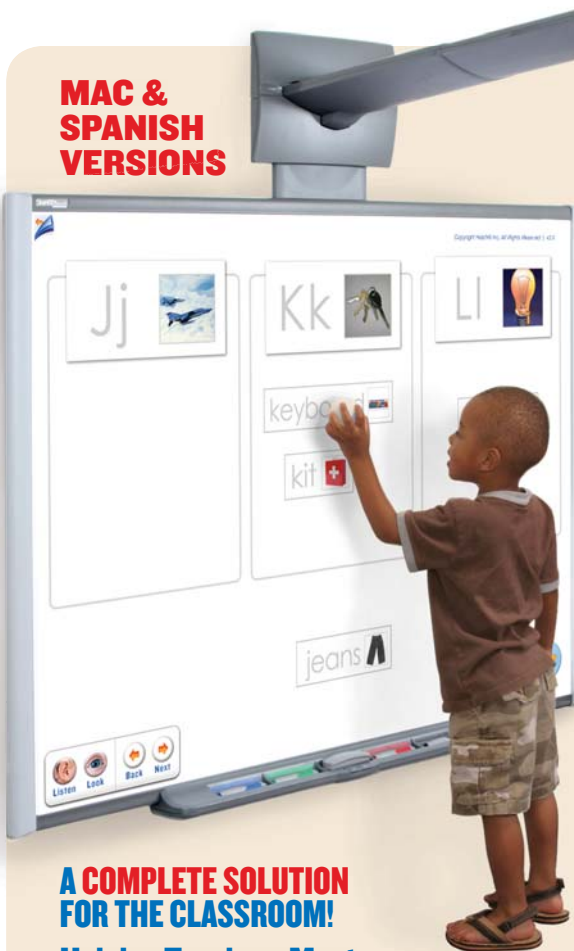

Skills are developed in pre-literacy, math, social studies and science. Through digital portfolios, **teachers can follow student progress through the four scaffolded development levels:** Emerging, Still Developing, Developed and Extension.

Teachers can modify TeachSmart activities with Make it Your Own to seamlessly integrate with their curriculum and customize for the learners in their classroom.

the Goal of Preparing
Children for Academic Success!**

TeachSmart is packaged with everything you need:

SMART Board™ Interactive Whiteboard

Includes projector system, boom mount, extended connection panel, remote control, input cables, set of pens and eraser.

Hatch® Computer

An up-to-date computer with the processing power, storage, memory, audio and video resources to fully support the activities of the TeachSmart® Learning System and Notebook™ Software. Wireless connectivity and integrated network controller are also included.

Hatch® Keyboard & Mouse, Stereo Speakers & Headset

Windows enhanced keyboard, optical USB scrolling mouse, amplified stereo speakers and headset with microphone.

Hatch® CPU Cabinet

Constructed out of Baltic Birch, the Hatch® CPU cabinet includes convenient storage and a nickel lock to protect the system.

Quick Reference Guide & User Manual

Installation, training & customer service guarantee!

Successful integration of the TeachSmart® Learning System in early childhood classrooms requires proper installation, set-up and staff development training.

With purchase of a TeachSmart Learning System or Computer Learning Center, Hatch® Representatives will install the furniture, computer and peripheral components in each classroom and also advise teachers on technology implementation.

In addition, Hatch® Representatives provide comprehensive training and staff development workshops with teachers to ensure the Computer Learner Center becomes an active, child-directed interest area in the classroom!

**INCLUDES:
INSTALLATION
TECH SUPPORT
& TRAINING!**

Training Services

Immediately following successful installation, training will occur in every classroom where a TeachSmart Learning System or Hatch Computer Learning Center is installed. The initial training covers **everything the teacher needs to know** to successfully and appropriately integrate the TeachSmart Learning System or the Hatch Computer Learning Center into the classroom. Available as long as the specific Hatch Technology product is in their classroom.

Additional Professional Development Training Services

In addition to initial training, you have the option of purchasing the fully customizable Professional Development Second Level Training sessions for the TeachSmart Learning System. These sessions are meant to be **personal and tailored** to your specific needs. Please contact your sales representative to customize this training specific to your organization.

One-Call-Does-It-All Support

In addition to our on-site training options, Hatch provides a "one call does it all" approach to supporting your staff via lifetime, toll-free telephone support. Hatch® also offers the option for email support that is always answered promptly. You simply contact Hatch® and receive **complete and friendly support** for all aspects of your product.

The Hatch® Warranty

Hatch provides lifetime, toll-free technical support, a two year warranty on parts and labor for the CPU, a 5-year warranty on registered SMART boards, a 3-year warranty on the projector and projector mount, and a 500 hour/90 day warranty on the bulb.

With decades of experience and expertise, you can count on Hatch to provide the personal attention necessary to support you and the high quality of education you provide to young children.
